

# Hamza Sourani

17/10/1998 ,Male ,Syrian

## Front End Web Developer

With 2 years of experience, specialized in developing responsive and user-friendly UIs using React.js. I am proficient in TypeScript and JavaScript, and I am adept at problem-solving, delivering high-quality code and creating seamless web experiences. I am also passionate about building innovative solutions and consistently contribute to impactful projects while continuously expanding my skills in front-end development.

## WORK EXPERIENCE

*Levant, Aleppo, Syria*

React.js Developer | Feb 2023 - Aug 2023

Developed Address dashboard

- Worked on the "Address project" dashboard with a team of developers, adding new features and improving existing functionality.
- Demonstrated expertise in Gitlab for collaborative development and code management.
- Developed applications using Clean Architecture principles and REST APIs.
- Applied JWT authentication and role-based permissions.
- Efficiently coordinate and streamline task management with teammates using ClickUp.

*Ulutech, Aleppo, Syria*

React.js Developer | Jul 2022 - Mar 2023

Developed Hamy dashboard and landing page

- Utilized Firebase Cloud Messaging for push notification integration.
- Applied Caching Data techniques to optimize app performance and enhance user experience.
- Proven ability in leveraging Gitlab to foster collaborative development, seamlessly manage code, and facilitate efficient teamwork.
- Built robust applications by implementing Clean Architecture principles and leveraging REST APIs for seamless integration and efficient data exchange.
- Implemented efficient data fetching with chunked table loading, scroll pagination, and performance-enhancing techniques like debounce searching.
- Applied authentication and user-based permissions.

## EDUCATION

ITE University of Aleppo,  
Aleppo, Syria | 2018-2023

Bachelor of Software  
Engineering

## Freelance Projects

### *STG Dashboard* | Jul 2023 - Oct2023

- Implemented secure authentication and role-based permissions, tailored to individual users.
- Utilized dynamic charts to visually represent analytics data and implement skeleton loading to enhance user experience during data loading.
- Implemented table pagination for efficient data navigation and utilize caching techniques to optimize performance and reduce server load.
- Enabled persistence of filter values to maintain user preferences and implemented debounce searching to enhance search functionality by reducing unnecessary API calls.

### *Real Estate App* | Aug 2023 - Sep2023

- Users are provided with the flexibility to either browse the app as a guest, accessing limited features, or authorize themselves to unlock the full array of app functionalities.
- Maximize the benefits of data caching by implementing scroll pagination for efficient data fetching, allowing seamless retrieval of content as users scroll. Additionally, ensure an optimal user experience by implementing optimistic user interface updates.
- The app further supports multilingual functionality with i18next, enabling users to seamlessly switch between English and Arabic .
- Implemented multi steps form managed with Formik and Yup, guaranteeing data integrity and accuracy.
- The app employs skeleton loading to enhance the user experience, providing placeholder content while data is being fetched.

### *Al Labeeb App* | Jan 2022 - Feb 2022

- The user interface is built using the Material-UI (MUI) library, ensuring responsive, sleek and visually captivating design.
- The app allows users to work with various media types, including uploading image files, recording voice, and capturing screenshots using the device's camera.
- Empowering project with Redux Toolkit, a single source of truth unfurls, harmonizing data flow and orchestrating a meticulously organized application. Harnessing the might of Thunk, API fetching becomes seamless, unlocking a realm of efficient data retrieval and management.
- Networking capabilities are enhanced with the use of Axios, a popular HTTP client library, which simplifies API calls.
