WORK EXPERIENCE

Levant

Full stack Engineer   JAN 2022 - JAN 2024

- Worked on the "*Address project*" and other projects with 8 developers and designers, adding new features and improving existing functionality using React.js and its ecosystem.
- Implemented secure authentication and role-based permissions, tailored to individual users.
- Mastered ReactJS with framer-motion to craft fluid, eye-catching animations that elevate the user experience.
- Developed scalable RESTful APIs with ExpressJS, enhancing data exchange efficiency.
- Implemented JWT for secure authentication and authorization.
- Designed optimized database schemas with TypeORM for improved performance.
- Utilized project management tools like Notion and ClickUp for remote project tracking.
- Demonstrated expertise in GitLab for collaborative development and code management.
- Adapted flexibly to changing project requirements and deadlines while maintaining high-quality work.

UluTech

Front-end Engineer   JUN 2020 - JAN 2022

- Collaborated with an agile team comprising 11 developers and designers to construct "*Humy*" products as well as other projects using React.js
- Applied Caching Data techniques to optimize app performance and enhance user experience.
- Implemented state management using Redux for efficient data handling.
- Integrated third-party APIs seamlessly for additional functionalities.
- Designed and implemented responsive UI components for optimal user experience.
- Ensured cross-browser compatibility and accessibility standards in frontend development

Freelancer

SOFT SKILLS

Problem-solving, self-development, Teamwork, Adaptability, Patience, Communications, Work-ethic, Flexibility

website and dashboard using React.js and its ecosystem, the app shows products such as coffee and nuts and adds them to the cart, with the ability to pay cash or online via Stripe gateway.

STG dashboard (2023): The dashboard web app is a robust solution for managing the STG Android app. It provides an engaging platform for gaming and winning prizes, with an intuitive user interface, optimized performance, and a seamless experience. Built with React.js, JavaScript, and TypeScript, the app offers an impressive array of features.

House Solutions (2023): As a Frontend Developer, a Real Estate project was developed using React.js and its ecosystem. The app is designed to be responsive, ensuring optimal user experience across different devices. It offers full functionality, providing users with a seamless and immersive experience.

Al Labeeb (2021): As a Frontend Developer, the app was built using React.js, incorporating various media types handling such as image uploads, voice recording, and camera screenshots. The focus was on delivering a seamless and user-friendly experience for Deaf users.
